(To be filled by the Candidate)

SEP - 37221

Time Allowed : 2 Hours]

[Maximum Marks : 200

Number of Pages in this Booklet : 28

Number of Questions in this Booklet : 100

Instructions for the Candidates

- Write your Seat No. and OMR Sheet No. in the space provided on the top of this page.
- This paper consists of **100** objective type questions. Each question will carry *two* marks. *All* questions of Paper II will be compulsory. At the commencement of examination, the question booklet will be given to the student. In the first 5 minutes, you are requested to open the booklet and compulsorily examine it as follows :
 - To have access to the Question Booklet, tear off the paper seal on the edge of this cover page. Do not accept a booklet without sticker-seal or open booklet.
 - Tally the number of pages and number of questions in the booklet with the information printed on the cover page. Faulty booklets due to missing pages/questions or questions repeated or not in serial order or any other discrepancy should not be accepted and correct booklet should be obtained from the invigilator within the period of 5 minutes. Afterwards, neither the Question Booklet will be replaced nor any extra time will be given. The same may please be noted.
 - After this verification is over, the OMR Sheet Number should be entered on this Test Booklet.
- Each question has four alternative responses marked (A), (B), (C) and (D). You have to darken the circle as indicated below on the correct response against each item.
Example : where (C) is the correct response.

(A)	(B)	(C)	(D)
<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
- Your responses to the items are to be indicated in the **OMR Sheet given inside the Booklet only**. If you mark at any place other than in the circle in the OMR Sheet, it will not be evaluated.
- Read instructions given inside carefully.
- Rough Work is to be done at the end of this booklet.
- If you write your Name, Seat Number, Phone Number or put any mark on any part of the OMR Sheet, except for the space allotted for the relevant entries, which may disclose your identity, or use abusive language or employ any other unfair means, you will render yourself liable to disqualification.
- You have to return original OMR Sheet to the invigilator at the end of the examination compulsorily and must not carry it with you outside the Examination Hall. You are, however, allowed to carry the Test Booklet and duplicate copy of OMR Sheet on conclusion of examination.
- Use only Blue/Black Ball point pen.
- Use of any calculator or log table, etc., is prohibited.
- There is no negative marking for incorrect answers.

विद्यार्थ्यांसाठी महत्वाच्या सूचना

- परिक्षार्थींनी आपला आसन क्रमांक या पृष्ठावरील वरच्या कोपऱ्यात लिहावा. तसेच आपणांस दिलेल्या उत्तरपत्रिकेचा क्रमांक त्याखाली लिहावा.
- सदर प्रश्नपत्रिकेत **100** बहुपर्यायी प्रश्न आहेत. प्रत्येक प्रश्नास **दोन** गुण आहेत. या प्रश्नपत्रिकेतील **सर्व** प्रश्न सोडविणे अनिवार्य आहे.
- परीक्षा सुरू झाल्यावर विद्यार्थ्याला प्रश्नपत्रिका दिली जाईल. सुरुवातीच्या 5 मिनीटांमध्ये आपण सदर प्रश्नपत्रिका उघडून खालील बाबी अवश्य तपासून पहाव्यात.
 - प्रश्नपत्रिका उघडण्यासाठी प्रश्नपत्रिकेवर लावलेले सील उघडावे. सील नसलेली किंवा सील उघडलेली प्रश्नपत्रिका स्विकारू नये.
 - पहिल्या पृष्ठावर नमूद केल्याप्रमाणे प्रश्नपत्रिकेची एकूण पृष्ठे तसेच प्रश्नपत्रिकेतील एकूण प्रश्नांची संख्या पडताळून पहावी. पृष्ठे कमी असलेली/कमी प्रश्न असलेली/प्रश्नांचा चुकीचा क्रम असलेली किंवा इतर त्रुटी असलेली सदोष प्रश्नपत्रिका सुरुवातीच्या 5 मिनिटातच पर्यवेक्षकाला परत देऊन दुसरी प्रश्नपत्रिका मागवून घ्यावी. त्यानंतर प्रश्नपत्रिका बदलून मिळणार नाही तसेच वेळही वाढवून मिळणार नाही याची कृपया विद्यार्थ्यांनी नोंद घ्यावी.
 - वरीलप्रमाणे सर्व पडताळून पाहिल्यानंतरच प्रश्नपत्रिकेवर ओ.एम.आर. उत्तरपत्रिकेचा नंबर लिहावा.
- प्रत्येक प्रश्नासाठी (A), (B), (C) आणि (D) अशी चार विकल्प उत्तरे दिली आहेत. त्यातील योग्य उत्तराचा रकाना खाली दर्शविल्याप्रमाणे ठळकपणे काळा/निळा करावा.
उदा. : जर (C) हे योग्य उत्तर असेल तर.

(A)	(B)	(C)	(D)
<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
- या प्रश्नपत्रिकेतील प्रश्नांची उत्तरे ओ.एम.आर. उत्तरपत्रिकेतच दर्शवावीत. इतर ठिकाणी लिहिलेली उत्तरे तपासली जाणार नाहीत.
- आत दिलेल्या सूचना काळजीपूर्वक वाचाव्यात.
- प्रश्नपत्रिकेच्या शेवटी जोडलेल्या कोन्या पानावरच कच्चे काम करावे.
- जर आपण ओ.एम.आर. वर नमूद केलेल्या ठिकाणा व्यतिरिक्त इतर कोठेही नाव, आसन क्रमांक, फोन नंबर किंवा ओळख पटेल अशी कोणतीही खूण केलेली आढळून आल्यास अथवा असभ्य भाषेचा वापर किंवा इतर गैरमार्गांचा अवलंब केल्यास विद्यार्थ्याला परीक्षेस अपात्र ठरविण्यात येईल.
- परीक्षा संपल्यानंतर विद्यार्थ्याने मूळ ओ.एम.आर. उत्तरपत्रिका पर्यवेक्षकांकडे परत करणे आवश्यक आहे. तथापि, प्रश्नपत्रिका व ओ.एम.आर. उत्तरपत्रिकेची द्वितीय प्रत आपल्याबरोबर नेण्यास विद्यार्थ्यांना परवानगी आहे.
- फक्त निळ्या किंवा काळ्या बॉल पेनचाच वापर करावा.
- कॅलक्युलेटर किंवा लॉग टेबल वापरण्यास परवानगी नाही.
- चुकीच्या उत्तरासाठी गुण कपात केली जाणार नाही.

SEP - 37221/II—A

Computer Science and Applications Paper II

Time Allowed : 120 Minutes]

[Maximum Marks : 200

Note : This Paper contains **Hundred (100)** multiple choice questions. Each question carrying **Two (2)** marks. Attempt *All* questions.

1.

 $V = \{A, B, C, D, E, F, G, H, I\}$
 $E = \{e1 = (A, B), e2 = (A, C), e3 = (A, D), e4 = (B, C), e5 = (B, F), e6 = (B, H), e7 = (C, D), e8 = (C, E), e9 = (C, F), e10 = (D, E), e11 = (D, I), e12 = (E, F), e13 = (E, G), e14 = (F, G), e15 = (F, H), e16 = (G, H), e17 = (G, I), e18 = (H, I)\}$
 $W = \{22, 9, 12, 35, 36, 34, 4, 33, 30, 18, 23, 24, 39, 25, 21, 19\}$

The order of node (vertex)-edge incidence matrix for the undirected graph is

- (A) 9×9
 (B) 9×18
 (C) 18×9
 (D) 18×18

2. The code word sent by the sender using the group codes words generated by

$$G = \begin{bmatrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 0 & 1 \end{bmatrix}, \text{ which is}$$

received as 001100 by the receiver.

- (A) 000000
 (B) 000111
 (C) 101100
 (D) 101011

3. Hamming distance of the following code words A and B is

A = 001001001001 and

B = 110100100110

- (A) 4
 (B) 6
 (C) 10
 (D) 12

4. Let X and Y be random variables with joint distribution :

$$\Pr(X = i, Y = j) =$$

$$\begin{cases} 1/6 & \text{for } i = 5, 6 \text{ and } j = 3, 6, 9 \\ 0 & \text{otherwise} \end{cases}$$

Then the mutual information $I(X, Y) = \dots\dots\dots$.

- (A) 0
(B) $\log(2)$
(C) $\log(3)$
(D) $\log(6)$
5. Let X and Y be random variable with the following distributions respectively :

X	1	2	3	4	5
P	0.1	0.2	0.4	0.2	0.1

Y	10	20	35	50	60
P	0.1	0.2	0.4	0.2	0.1

- (A) Entropy of distribution of X and Y are same, Coefficient of Variations are the same
(B) Entropy of distribution of X and Y are not same, Coefficient of Variations are the same
(C) Entropy of distribution of X and Y are same, Coefficient of Variations are not same
(D) Entropy of distribution of X and Y are not same, Coefficient of Variations are not same

6. Notation :

$$C(n, r) = n!/(r!*(n-r)!)$$

$n!$ is factorial n .

$|A|$ cardinality of set A

\bar{s} is negation of s

The $C(2n + 2, n + 1) = \dots\dots\dots$.

- (A) $C(2n + 2, n + 1) + 2C(2n + 2, n) + C(2n + 2, n - 1)$
(B) $C(2n + 1, n + 1) + 2C(2n + 1, n) + C(2n + 1, n - 1)$
(C) $C(2n, n + 1) + 2C(2n, n) + C(2n, n - 1)$
(D) $C(2n, n + 1) + 2C(2n, n) + C(2n, n - 1)$

7. Consider the following Linear Programming Problem :

A company manufactures three products P1, P2, P3. The sale of one unit of P1 results in profit of Rs. 5. For one unit of P2 and P3 the profit is Rs. 6 and Rs. 4 respectively. P1 requires 3 hours of machine work and 2 hours of labour. P2 requires 1 hour of machine work and 3 hours of labour and P3 needs 4 hours of machine work and 3 hours of labour. In a week 60 machine hours and 75 hours of labour is available. How many units of P1, P2, P3 should be produced per week to maximize the profit ?

The primal and the dual of this problem are :

$$\begin{aligned} \text{(A) Maximize : } Z &= 5x_1 + 6x_2 + 4x_3 \\ \text{Subject to } 3x_1 + x_2 + 4x_3 &\leq 60 \\ 2x_1 + 3x_2 + 3x_3 &\leq 75 \\ x_1, x_2, x_3 &\geq 0 \end{aligned}$$

Dual : Maximize :

$$\begin{aligned} Z' &= 60y_1 + 75y_2 \\ \text{Subject to } 3y_1 + 2y_2 &\geq 5 \\ y_1 + 3y_2 &\geq 6 \\ 4y_1 + 3y_2 &\geq 4, y_1, y_2 \geq 0 \end{aligned}$$

$$\begin{aligned} \text{(B) Maximize : } Z' &= 5x_1 + 6x_2 + 4x_3 \\ \text{Subject to } 3x_1 + x_2 + 4x_3 &\leq 60 \\ 2x_1 + 3x_2 + 3x_3 &\leq 75 \\ x_1, x_2, x_3 &\geq 0 \end{aligned}$$

Dual : Minimize :

$$\begin{aligned} Z' &= 60y_1 + 75y_2 \\ \text{Subject to } 3y_1 + 2y_2 &\leq 5 \\ y_1 + 3y_2 &\leq 6 \\ 4y_1 + 3y_2 &\leq 4, y_1, y_2 \geq 0 \end{aligned}$$

$$\begin{aligned} \text{(C) Maximize : } Z &= 5x_1 + 6x_2 + 4x_3 \\ \text{Subject to } 3x_1 + x_2 + 4x_3 &\leq 60 \\ 2x_1 + 3x_2 + 3x_3 &\leq 75 \\ x_1, x_2, x_3 &\geq 0 \end{aligned}$$

Dual : Minimize :

$$\begin{aligned} Z' &= 60y_1 + 75y_2 \\ \text{Subject to } 3y_1 + 2y_2 &\geq 5 \\ y_1 + 3y_2 &\geq 6 \\ 4y_1 + 3y_2 &\geq 4, y_1, y_2 \geq 0 \end{aligned}$$

$$\begin{aligned} \text{(D) Minimize : } Z &= 5x_1 + 6x_2 + 4x_3 \\ \text{Subject to } 3x_1 + x_2 + 4x_3 &\geq 60 \\ 2x_1 + 3x_2 + 3x_3 &\geq 75 \\ x_1, x_2, x_3 &\geq 0 \end{aligned}$$

Dual : Maximize :

$$\begin{aligned} Z' &= 60y_1 + 75y_2 \\ \text{Subject to } 3y_1 + 2y_2 &\leq 5 \\ y_1 + 3y_2 &\leq 6 \\ 4y_1 + 3y_2 &\leq 4, y_1, y_2 \geq 0 \end{aligned}$$

8. Which of the following statements is *true* ?

- (A) Simplex method is so robust that it is guaranteed to give the solution of any linear programming problem
- (B) Simplex method searches for the solution through interior of the feasible region
- (C) Karmarkar's algorithm searches for the solution through corner points of the feasible region
- (D) Simplex method approaches the solution by moving from corner to corner along the edges

9. Consider the following transportation problem :

Warehouse

Factory

	W_1	W_2	W_3	W_4	
F_1	1	2	3	4	6
F_2	4	3	2	0	8
F_3	0	2	2	1	10
	4	6	8	6	

A solution to the problem is given below :

	6		
		2	6
4		6	

Which of the following is true about the solution ?

- (A) Degenerate but not optimal
- (B) Degenerate and optimal
- (C) Non-degenerate and optimal
- (D) Optimality cannot be tested

10. Compute the maximal flow through the following network :

- (A) 70 units
- (B) 65 units
- (C) 60 units
- (D) 75 units

11. The t_{pd} for each flip-flop is 50ns, determine the maximum operating frequency for MOD-32 ripple counter :

- (A) 4 MHz
- (B) 3 MHz
- (C) 4 GHz
- (D) 2 MHz

12. The decimal equivalent of $8 D_H$ in sign magnitude form is :

- (A) 13
- (B) -13
- (C) -11
- (D) 11

| <p>13. If an even parity Hamming code 0110011 is transmitted and that 0100011 is received. The receiver is unaware of what was transmitted ? Determine the bit location where error has occurred using received code.</p> <p>(A) Bit in 3rd location is wrong</p> <p>(B) Bit in 4th location is wrong</p> <p>(C) Bit in 5th location is wrong</p> <p>(D) Bit in 1st location is wrong</p> <p>14. The word size of memory IC can be increased by connecting 2 memory ICs in such a way that their :</p> <p>(A) Data bus is in series and address bus in parallel</p> <p>(B) Data bus is in parallel and address bus in parallel</p> <p>(C) Data bus is in series and address bus in series</p> <p>(D) Data bus is in parallel and address bus in series</p> | <p>15. A t-state is measured from the falling edge of one clock pulse to the falling edge of the next clock pulse. Fetch cycle and the execution cycle take how many of the following t-states ?</p> <p>(A) 2 and 1</p> <p>(B) 3 and 4</p> <p>(C) 4 and 3</p> <p>(D) 2 and 3</p> <p>16. XLAT instruction in assembly is used to :</p> <p>(A) Perform string conversions</p> <p>(B) Perform character conversions</p> <p>(C) Improve performance</p> <p>(D) None of the above</p> <p>17. Individual control words in a micro-programmed control unit is known as :</p> <p>(A) Micro-routine</p> <p>(B) Micro-program</p> <p>(C) Micro-word</p> <p>(D) Micro-instruction</p> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>18. Vector processing eliminates the overhead associated with time it takes to fetch and execute the instructions in the :</p> <p>(A) Program</p> <p>(B) Function</p> <p>(C) Control structures</p> <p>(D) Sub-routines</p> | <p>20. One of the following is <i>not</i> a key characteristic of NUMA machines :</p> <p>(i) There is a single address space visible to all CPUs</p> <p>(ii) Access to remote memory is via LOAD and STORE instructions</p> <p>(iii) Access to remote memory is faster than access to local memory</p> <p>(iv) Access to remote memory is slower than access to local memory</p> |
| <p>19. The amount of time required to read a block of data from a disk into memory is composed of transfer time, seek time and rotational latency. Rotational latency refers to :</p> <p>(A) Time required by the platter to rotate the correct sector under the head</p> <p>(B) Time required by the read-write head to move to the position over the appropriate track</p> <p>(C) The time required by the platter to make a full rotation</p> <p>(D) The time required by the r/w head to come under a cylinder</p> | <p>(A) (i)</p> <p>(B) (ii)</p> <p>(C) (iii)</p> <p>(D) (iv)</p> |

21. The syntax of expression in a language can be characterised by :

- (i) a table giving associativity and precedence
- (ii) a grammar for expression
- (iii) expression are always to be written in infix notation
- (iv) use of terminal per precedence level

- (A) (i) and (ii)
- (B) (ii) and (iii)
- (C) (iii) and (iv)
- (D) (i), (ii) and (iii)

22. Which of the following are fundamental operation on pointers ?

- (i) implicit dereferencing
- (ii) indirection
- (iii) explicit referencing
- (iv) addressing

- (A) (i), (ii) and (iii)
- (B) (i) and (ii)
- (C) (ii) and (iii)
- (D) (iv) only

23. Consider the following 'C' program fragment :

```
if(tPTR != NULL)
    * tPTR = NULL;
else
    * tPTR = NULL;
```

Select the following statements that are having same effect :

- (i) if (tPTR) * tPTR = NULL;
 - else * tPTR = NULL
- (ii) *tPTR = NULL;
- (iii) if (!tPTR) * tPTR = NULL;
 - else * tPTR = NULL;
- (iv) if (tPTR == NULL) * tPTR = NULL;
 - else * tPTR = NULL;

- (A) (i) and (ii)
- (B) (i), (ii), (iii) and (iv)
- (C) (ii), (iii) and (iv)
- (D) (ii) only

| <p>46. Consider a system with seven processes A through G and six resources R through W. Resource ownership is as follows :</p> <p>Process A holds R and wants T
 Process B holds nothing but wants T
 Process C holds nothing but wants S
 Process D holds U and wants S and T
 Process E holds T and wants V
 Process F holds W and wants S
 Process G holds V and wants U
 Are there any processes deadlocked ?</p> <p>(A) No process
 (B) Yes, A, B, C
 (C) Yes, D, E, G
 (D) Yes, A, B, F</p> <p>47. An operating system (OS) crashes on the average once in 30 days, that is, the Mean Time Between Failures (MTBF) = 30 days. When this happens, it takes 10 minutes to recover the OS, that is, the Mean Time To Repair (MTTR) = 10 minutes. The availability of the OS with these reliability figures is approximately :</p> <p>(A) 96.97%
 (B) 97.97%
 (C) 99.009%
 (D) 99.97%</p> | <p>48. Consider a disk queue with I/O requests on the following cylinders in their arriving order 6, 10, 12, 54, 97, 73, 128, 15, 44, 110, 34, 45. The disk head is assumed to be at cylinder 23 and moving in the direction of decreasing number of cylinders. Total number of cylinders in the disk is 150. The disk head movement using SCAN-scheduling algorithm is :</p> <p>(A) 172
 (B) 173
 (C) 151
 (D) 228</p> <p>49. A specific editor has 200 K of program text, 15 K of initial stack, 50 K of initialized data, and 70 K of bootstrap code. If five editors are started simultaneously and shared text is used, how much physical memory will be needed ?</p> <p>(A) 1135 K
 (B) 335 K
 (C) 1065 K
 (D) 320 K</p> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

54. Which of the following software architecture is prone to 'single point of failure' vulnerability ?
- (A) Client-server
 - (B) Peer-to-peer
 - (C) Service-oriented
 - (D) Distributed-object
55. Vocabulary of a program is defined as :
- (A) $n = n_1 + n_2$
 - (B) $n = n_1 - n_2$
 - (C) $n = n_1 \times n_2$
 - (D) $n = n_1 / n_2$
56. Which model assumes that effort and development time are functions of product size alone ?
- (A) Basic COCOMO
 - (B) Detailed COCOMO
 - (C) Intermediate COCOMO
 - (D) COCOMO
57. During the change control process, which of the following activities are required to be initiated ?
- (i) While software configuration identification (SCI) is under development it can change freely since it is not under SCM.
 - (ii) While under review, the software configuration identification (SCI) is considered to be "Frozen".
 - (iii) Once SCI is reviewed and approved, it is entered into a library; the SCI is now formally under SCM.
 - (iv) Check in-check out process : once the change has been approved, the SCI has to be checked out from the library for change; once the change has been implemented, the SCI must be checked in to the library.
- (A) (i), (ii), (iii) and (iv)
 - (B) (ii), (iii) and (iv)
 - (C) (i), (ii) and (iii)
 - (D) (i) and (iv)

| <p>58. Basic path testing is
 (A) a whitebox testing technique
 (B) a blackbox testing technique
 (C) Both whitebox and blackbox testing techniques
 (D) Neither whitebox nor blackbox testing technique</p> <p>59. The test conducted to ensure that due to addition of modules, software do not unintended behaviour or extra errors are not added, is known as
 (A) Smoke testing
 (B) Regression testing
 (C) Performance testing
 (D) Stress testing</p> <p>60. Which amongst the following statements are not true for Quality Assurance ?
 (i) Quality Assurance aims to prevent the defects
 (ii) Quality Assurance is a reactive measure
 (iii) Quality Assurance manages the quality validation
 (iv) Quality Assurance covers full development life cycle
 (A) (i) and (ii)
 (B) (i) and (iv)
 (C) (ii) and (iv)
 (D) (ii) and (iii)</p> | <p>61. The prefix form of $(A - B / C) * (A / K - L)$ is :
 (A) $* - / - / A B C A K L$
 (B) $A B C A K L * - / - /$
 (C) $* - A / B C - / A K L$
 (D) $* - A B C / - A K L /$</p> <p>62. Which of these best describes an array ?
 (A) A data structure that shows a hierarchical behaviour
 (B) Container of objects of similar types
 (C) Container of objects of mixed types
 (D) Heterogeneous data types</p> <p>63. Which of the following application makes use of a circular linked list ?
 (A) Undo operation in a text editor
 (B) Allocating CPU to resources
 (C) Recursive function calls
 (D) Expression evaluation</p> |

78. Consider the context free Grammar with 7 (seven) productions.
- $$S \rightarrow Aa / B$$
- $$B \rightarrow A / bb$$
- $$A \rightarrow a / bc / B$$
- After removing all unit productions the resulting equivalent grammar will contain productions.
- (A) 18
(B) 12
(C) 10
(D) 11
79. Which of the following is *correct* statement ?
- (i) A language is a regular language if and only if it can be represented by a regular expression.
- (ii) A language is a regular if and only if it cannot be generated by a regular grammar.
- (iii) Every regular grammar is context free grammar.
- (A) (i) only
(B) (i) and (ii) only
(C) (i) and (iii) only
(D) (iii) only
80. The grammar $S \rightarrow aSa/bS/d$ is :
- (A) LL(1) but not LR(1)
(B) Neither LL(1) nor LR(1)
(C) LR(1) but not LL(1)
(D) Both LL(1) and LR(1)
81. Suppose we have to send an E-mail with an attachment of 2.5 kbyte with 1 Gbps bandwidth. Assume that the distance between the sender and the receiver is 12000 km and the light travels at 2.4×10^8 m/s. What will be the propagation time ?
- (A) 208 ms
(B) 50 ms
(C) 200 ms
(D) 600 ms
82. We have a LAN with 10 Mbps bandwidth and average 12000 frames per minutes and size of each frame is 10000 bits. Then its throughput will be
- (A) 0.83 Mbps
(B) 2 Mbps
(C) 0.2 Mbps
(D) 20 Mbps

83. Which is the only layer of OSI model that prevents itself from adding its own header to the data during the data transmission process ?
- (A) Application layer
 - (B) Network layer
 - (C) Physical layer
 - (D) Transport layer
84. In a leaky bucket used to control liquid flow, how many gallons of liquid are left in the bucket if the output rate is 6 gal/min, there is an input burst of 100 gal/min for 12 sec and there is no input for 48 sec ?
- (A) 20 gal
 - (B) 5 gal
 - (C) 15 gal
 - (D) 13 gal
85. In symmetric-key cryptography, if every person in a group of 10 people needs to communicate with every other person in another group of 10 people, how many minimum secret keys are needed ?
- (A) 1
 - (B) 10
 - (C) 100
 - (D) 50
86. Which mechanism in transport layer supplies multiple network connections along with the distribution of traffic over them in a round-robin basis/fashion ?
- (A) Upward Multiplexing
 - (B) Downward Multiplexing
 - (C) Buffering and Flow Control
 - (D) Crash Recovery
87. While linking to the internet mail system which of the following 'mailto' anchors is correct ?
- (A) ` send a page to amit `
 - (B) ` send a page to amit `
 - (C) `<a href : "mailto : amitkumar @ gmail.com"> send a page to amit `
 - (D) `<a href : "mailto : amitkumar @ gmail.com"> send a page to amit `

94. Which amongst the following are essential components of an expert system ?

- (i) Inference engine
- (ii) Context graph
- (iii) Knowledge base
- (iv) Computer vision

- (A) (i) and (ii)
- (B) (i) and (iii)
- (C) (i), (ii) and (iii)
- (D) (ii), (iii) and (iv)

95. What features amongst the following would be required for a computer program to pass the Turing test ?

- (i) Natural language processing
- (ii) Knowledge representation
- (iii) Automated reasoning
- (iv) Computer vision
- (v) Machine learning
- (vi) Problem solving

- (A) (i), (ii) and (iii)
- (B) (i), (ii), (iii) and (iv)
- (C) (i), (ii), (iii) and (v)
- (D) (i), (ii), (iv) and (vi)

96. The probability of 1-point crossover, with crossover rate P_c , to break the schema of length ' l ' given by :

- (A) $\frac{P_c * P_c}{l - 1}$
- (B) $\frac{P_c * D(H)}{l - 1}$
- (C) $\frac{P_c}{l}$
- (D) $\frac{P_c * D(H)}{l}$

97. If

$$\underline{P} = \left\{ \frac{0.1}{C_1} + \frac{0.5}{C_2} + \frac{10}{C_3} \right\} \text{ and}$$

$$\underline{S} = \left\{ \frac{0.3}{S_1} + \frac{0.8}{S_2} \right\}.$$

The relation between \underline{P} and \underline{S} in set theoretic form is :

- (A) $\begin{bmatrix} 0.1 & 0.1 \\ 0.3 & 0.5 \\ 0.3 & 0.8 \end{bmatrix}$
- (B) $\begin{bmatrix} 0.1 & 0.3 \\ 0.5 & 0.8 \\ 1 & 0.1 \end{bmatrix}$
- (C) $\begin{bmatrix} 0.2 & 0.5 \\ 0.1 & 0.8 \\ 0.1 & 0.2 \end{bmatrix}$
- (D) $\begin{bmatrix} 0.2 & 0.8 \\ 0.9 & 0.5 \\ 0.3 & 0.3 \end{bmatrix}$

98. If the fuzzy relations \tilde{R} and \tilde{S} are defined as follows :

$$\tilde{R} = \begin{bmatrix} 0.7 & 0.5 \\ 0.8 & 0.4 \end{bmatrix} \quad \text{and}$$

$$\tilde{S} = \begin{bmatrix} 0.9 & 0.6 & 0.2 \\ 0.1 & 0.7 & 0.5 \end{bmatrix}$$

then using max-min composition

$T = \tilde{R} \circ \tilde{S}$ is represented as :

(A) $\begin{bmatrix} 0.7 & 0.6 & 0.5 \\ 0.8 & 0.6 & 0.4 \end{bmatrix}$

(B) $\begin{bmatrix} 0.9 & 0.6 & 0.2 \\ 0.1 & 0.7 & 0.5 \end{bmatrix}$

(C) $\begin{bmatrix} 0.2 & 0.1 & 0.1 \\ 0.7 & 0.1 & 0.1 \end{bmatrix}$

(D) $\begin{bmatrix} 0.2 & 0.3 & 0.4 \\ 0.1 & 0.1 & 0.9 \end{bmatrix}$

99. Hopfield networks have the “energy”, E , associated with them. Thus for Hopfield network with symmetric weights, this energy, E at each state may

- (A) Increase
- (B) Decrease
- (C) Decrease or remain same
- (D) Decrease or increase

100. In artificial neural network (ANN) training, epochs represent the total number of :

- (A) Input layer nodes
- (B) Passes of the training data through the network
- (C) Network nodes
- (D) Passes of the test data through the network
